

To activate the 1-year warranty on your  
Bluetooth Keyboard, visit

<http://www.alpatronix.com/>

and click on the warranty link to register your product  
by filling out a simple and easy form. Alpatronix  
warranty will fully cover your purchase against all  
defects in material and/or workmanship for an entire  
year. Most return policies only allow returns for a  
period of 14 – 30 days from the date of purchase, so  
hurry and register your product to give yourself peace  
of mind knowing Alpatronix has got you covered for a  
whole year.

## **Step I: Register Your Product**

**You must register your product to activate the 1-year warranty. It's quick and easy.**

Most return policies only allow for a defective product to be returned within 14 – 30 days after the date of purchase... and most issues that happen due to defects in material and workmanship have a knack of happening after this return period has ended. We have seen the sad-puppy look on customers' faces for too long and understand how upsetting it is to spend your hard-earned dollars on something that stops working after a few weeks! That's why Alpatronix's Ironclad Warranty will protect you for a whole year against all defects in material and/or workmanship. So register your product at [www.alpatronix.com/register](http://www.alpatronix.com/register) to activate your warranty and rest easy that you are covered no matter what the return policy is where you purchased your product!

If you have a defective product and need us to take care of you, email us at [support@alpatronix.com](mailto:support@alpatronix.com) and rest assured that our support team will make this a quick and easy process with as little pain as possible.

**Notice:** Alpatronix warranty is only valid within the country in which you purchased the item from, and only for purchases made from authorized retailers. If you are not sure whether the retailer you are purchasing from is an authorized retailer, please contact us and we will be happy to further assist you. Alpatronix sells directly on Amazon.com, on the Alpatronix.com website, and in certain International markets (Amazon and eBay). Alpatronix warranty does not cover user damage. Tampering with your device or user damage also voids the manufacturer warranty.

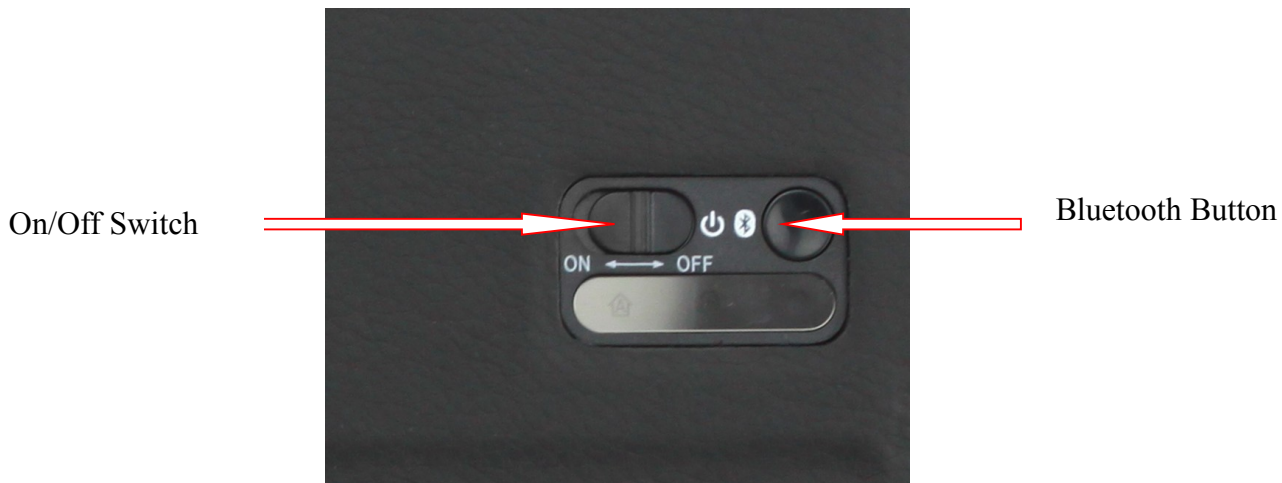

## **Step II: Place your iPad into the case**

- Slide your iPad into the case.
- Close the Velcro strap to prevent the iPad from slipping out.
- Place the case into a comfortable position.

**Notice:** This device has been designed to fit the new iPad Pro 10.5”, and will not fit other types of iPad (iPad mini, iPad 1-4, iPad Air, or iPad Pro 12.9”). If you have purchased the incorrect product, please contact our customer service department for an exchange.

### **Step III: Turn the keyboard on**

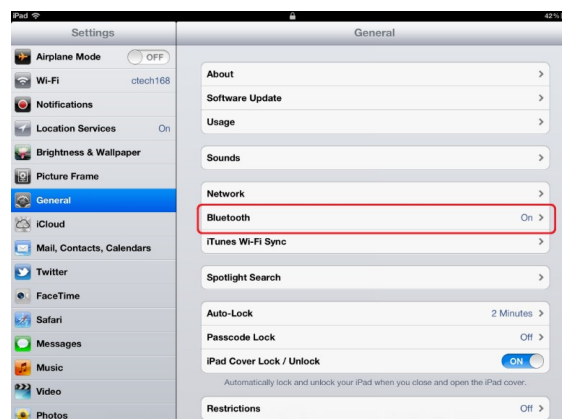

- Charge the keyboard with the USB cable included.  
The built-in lithium battery supports up to 250 hours of continuous typing when fully charged.
- Slide the power button to “ON” position to power up the keyboard.  
The On/Off switch and the Bluetooth Button are on the top right-hand corner of the keyboard.

### **Notification Light Meanings**

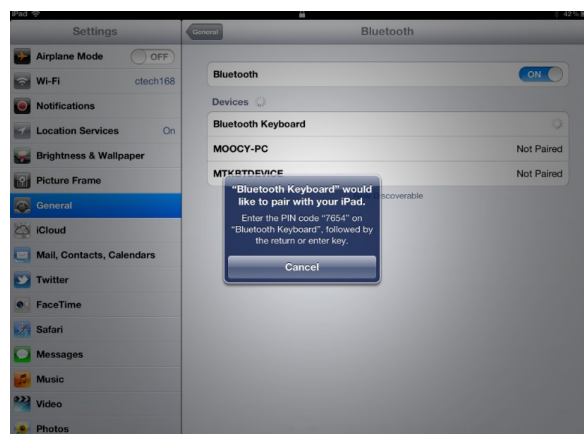

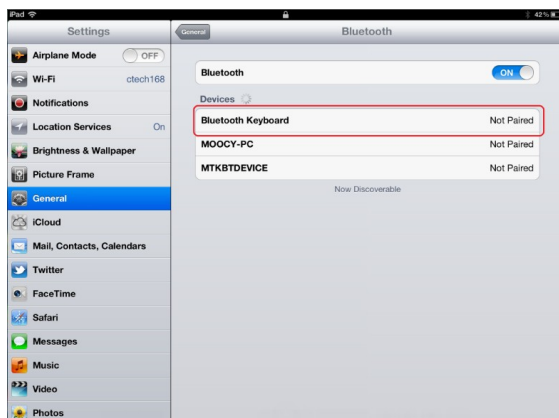

- White: CAPS Lock is on.
- Flashing Yellow: Keyboard’s battery is low.
- Red: Keyboard is being charged.
- Green: Battery is fully charged.
- Flashing Bluetooth Light: The paring between the keyboard and the iPad is under process.
- Steady Bluetooth Light: iPad and keyboard are paired.

## Step IV: Pair the keyboard with your iPad

- Press the Bluetooth key to activate Keyboard's Bluetooth signal.
- Turn your iPad on and tap "Settings"---"General"---"Bluetooth"
- Slide the Bluetooth to "On" and your iPad will start to search for Bluetooth devices. When it finds the "Bluetooth keyboard", tap it and begin pairing.

- A pop-up window on your iPad will display a password. Enter this password on your keyboard and press the Enter Key.

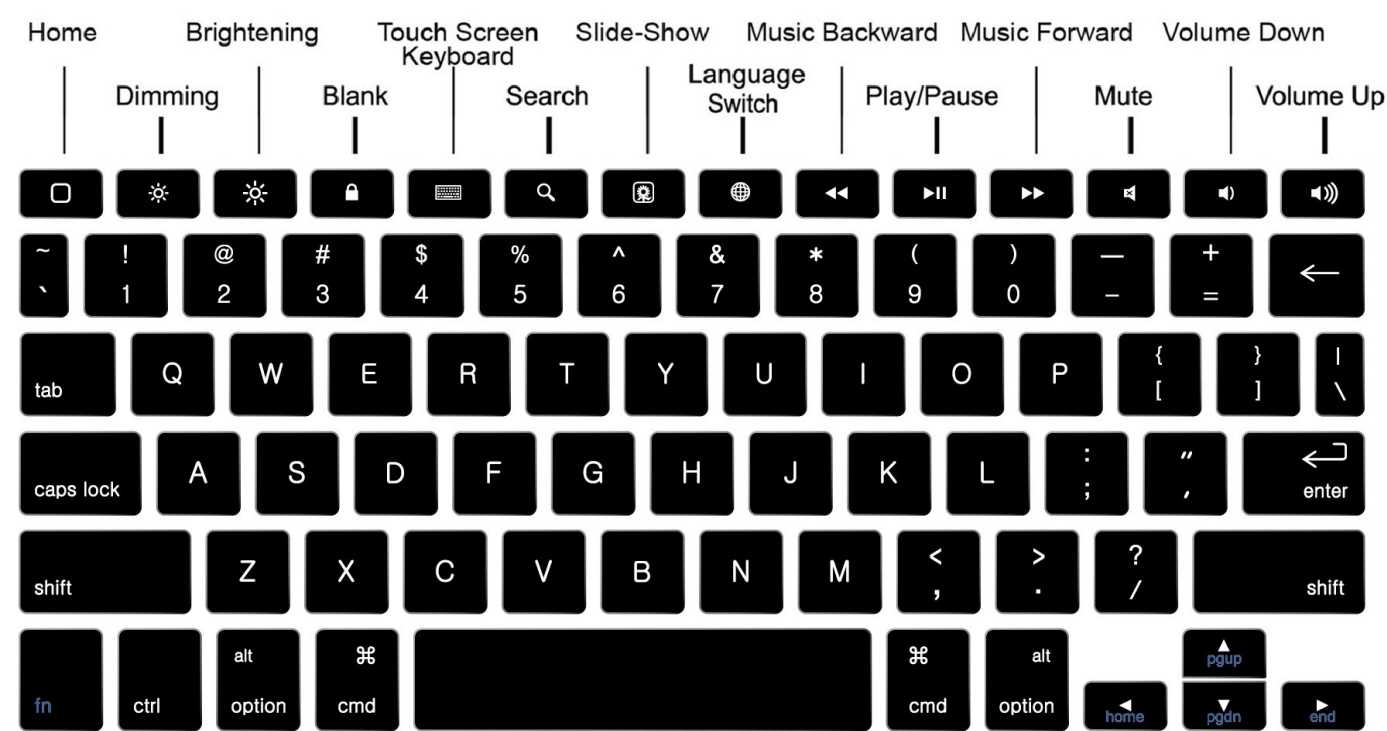

## Attention

Follow step III only in the initial setup. After the first successful connection, the keyboard will connect automatically to your iPad whenever you turn the power on. You may need to tap on the keys to wake it up from hibernate mode.

Keyboard Layout

⌘	+		Language Switch
⌘	+	C	Copy
⌘	+	V	Paste
⌘	+	X	Cut
⌘	+	Z	Redo
⌘	+		To the top of the text
⌘	+		To the end of the text
⌘	+		Delete the whole line
Shift	+		Select text to the right of cursor
Shift	+		Select text to the left of cursor
Shift	+		Select text above the cursor
Shift	+		Select text below the cursor

## **Technical Specifications**

Bluetooth Specification: Version 4.1

Operation Current: <5mA

Standby Current: 1.2mA

Operating Time: 250 hours

Standby Time: 800 hours

Charging Voltage: 110-240V

Battery Type: Lithium battery

Charging period: 3 hours (For the first time, please charge for 12 hours)

## **Troubleshooting**

If you are unable to connect the keyboard to your iPad, follow the steps below:

- Check if the battery is low. When the battery is low, some keys react slowly or would not respond at all. Charge the battery fully and try again.
- Check the power switch and make sure it is on. When it is on, the power light on the top right-hand corner of the keyboard flashes for two seconds.
- Press the Bluetooth button, make sure your iPad can find this device.
- Ensure the password for pairing is correct.
- Try un-pairing by going to the Bluetooth section of your iPad, choosing Bluetooth keyboard, and selecting “Forget this Device.” Turn Bluetooth off for 3 seconds on your iPad, and turn it back on. Repeat step III to reestablish pairing.

Your keyboard is typing in a different language, or typing weird characters:

- This keyboard, like any other Bluetooth device, works on a master/slave system and cannot change the preset settings of your device. If your keyboard is typing in a different language or using a different font, you will need to change those using the “Settings -> General -> Keyboard”.

You have connected the keyboard to a non-Apple device

- The Bluetooth keyboard can work with non-Apple, Bluetooth enabled devices. However, please note that the function keys (brightness, play/pause, etc.) only work properly with Apple devices and may not work as intended with non-Apple devices.
